**DETAILED ACTION**

1. This action is in response to applicant's amendment received on 09/02/03.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 2-3, 5-7, 10-14, 23-24 and 27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Palm in view of McCurry et al.

Palm discloses the invention including a lever 52, a locking member 48, a first end 54, a second end, a plurality of teeth (Fig. 5), a retainer member 22 supported by the housing and defining a channel 28 and a slot (Fig. 1). Palm does not show the lever engages the first and second ends of the locking member, first and second openings (Fig. 4). However, McCurry teaches the use of a lever engaging the first and second ends of the locking member (Fig. 3) for the purpose of providing a quick release of the blade. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Palm's device by providing the lever as taught by McCurry in order to obtain a quick release of the locking member.

***Allowable Subject Matter***

4. Claims 8-9, 25-26 and 28-30 are allowed.

***Response to Arguments***

5. Applicant's arguments have been fully considered but they are not persuasive. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation can be found in the knowledge generally available to one of ordinary skill in the art that the McCurrys' quick release device can be use for left or right hand.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3724
